

Team Edward or Team Jacob?

1. Edward
2. Jacob
3. I don't care
4. Huh?

Twilight

The definition of *Twilight* is based on θ_s , the angle of the center of the sun above the horizon:

Day $\theta_s \geq 0$

Civil Twilight $0 > \theta_s \geq -6^\circ$

Nautical Twilight $-6^\circ > \theta_s \geq -12^\circ$

Astronomical Twilight $-12^\circ > \theta_s \geq -18^\circ$

Night $\theta_s < -18^\circ$
